

Hi good afternoon My dear parents and fellow classmates of 2022
Welcome my dear parents come here to share the happiness and
achievement of graduation. Thank you so much
Congratulation! My dear fellow classmates. you are going to graduate
from Frobel. Are you happy?

We are so happy that we could host this real ceremony for graduation in
this serious Omicron. It's truly hard. I have to say" thank you" to my
school members because they make more efforts for this graduation
ceremony. Would you please give them a big hand? Thank you.

The theme of this graduation is" The sky is the limit."
This phrase I love. This phrase also let me think about a movie. The
name of movie is "Toy story". There is an actor whose name is Buzz
Light year. When he wants to fly into sky he always says " To infinity
and beyond " These two phrases are same meaning. That's kind of
ambition, very strong ambition to desire for success. So your teachers
give this phrase to you and hope you take this strong ambition for your
future learning.....

We are so proud of you. You are the best. Why we say you are the best.
Because you have finished Frobel schoolwork. We all know the Frobel
schoolwork is really harder than other school. You have to spend more
efforts, pay more attention than other school students. You have to
study hard, study all the day, all the year. So right now you have very
strong foundation of learning ability and you are going to take this ability
to get into junior high and compete with other school students. I
guarantee every single one of you will be excellent.

Even though you are the best and excellent, I would like to remind you
there will be lots of challenges and frustration on the way of your further
learning. That's reality and unavoidable. You have to face them bravely
and conquer them seriously. You can take these challenges to improve
yourself step by step. You also can ask someone you trust to help you, to
support you when you struggle in frustration. Like as your parents, your
teachers. All you have to do us keep trying. Don't give up.

Right now I will show you a YouTube video that I always used it to be
material for learning English. I choose one of them for you. The guy in
the video who got the first place in world champion of public speaking.
You can learn not only how to make impressive speech but also learn
some inspiration from this speech. Let's take a look.
